

Chessington World of Adventures Resort in partnership with
Animal Concepts and Odense Zoo are hosting an

Advanced Animal Training Workshop

22nd - 25th November 2011 inclusive

This in-depth workshop is aimed at animal care professionals and students wishing to develop their knowledge and skills of animal learning with a focus on positive reinforcement training. Special emphasis will be on conditioning animals for husbandry procedures

Workshop Costs

£400 for 4 full days which includes any study materials, all refreshments including lunch
Student rate: £250

The workshop is being held at Holiday Inn Chessington where accommodation is also available. Practical demonstrations will take place at Chessington WoAR with a variety of exotic species.

Kirstin Anderson-Hansen

Sabrina Brando

Assistant Curator and Supervisor of Training
Odense Zoo

Kirstin has been working as a biologist and trainer for 22 years, starting at the University of California in Santa Cruz and Long Marine Lab, with focus on marine mammals. She continued with marine mammals at the John G. Shedd Aquarium in Chicago and in 1998 moved to Denmark where she worked as Head Trainer at the Fjord and Bælt Centre.

For the past seven years, she has been working at Odense Zoo expanding to all species of animals. She is the instructor for the trainer education within the Danish Association of Zoo and Aquaria and co-chair for the Training Advisory Group for the European Association of Zoo and Aquaria.

Owner
AnimalConcepts

Sabrina has a background in psychology and is working as an animal behaviour & welfare consultant, travelling world wide to universities, zoos, research labs, wildlife sanctuaries and conservations centres. In 1992 she started at the rehabilitation centre for stranded marine mammals in the Netherlands and has since worked with a variety of captive and wild animals in different settings. Sabrina teaches as a guest lecturer on the MRes in Marine Mammal Science at the St. Andrews University in Scotland, teaches a IAT CPD course on enrichment for laboratory animals, sits on the Advisory Council of the Barcelona Zoo in Spain and is a Visiting Scholar at the Franklin and Marshall College in Lancaster - USA. She is a lecturer at Tinley Education in the Netherlands, collaborates with the Royal Dutch Police Force and serves as an External Expert on an EU project titled "EU Zoos and Science in the 21st Century: engaging the public in nature conservation". In her free time she volunteers for PASA, a network of primate conservation sanctuaries in Africa as well as other conservation centres worldwide.
